

Radiographers and their role in *your* care

Professionalism shapes how we care for every patient

When you receive an X-ray, MRI, ultrasound, CT scan, mammogram or radiotherapy treatment, you will be supported by a member of the radiography workforce.

- We explain procedures clearly, so you know what to expect
- We listen to your questions and concerns
- We prioritise your safety by following best practice
- We adapt our approach to meet your needs
- We protect your dignity
